APBMW BIAMP 2

BMW - MINI OEM REPLACEMENT

APBMW BIAMP 2 Plug & Play T-harness provides the ability to:

1. Take the front speaker output signal from the OEM head unit through the under-seat woofer connector and route it to the Audison bit amplifier input.
2. Separately route the signal from the Audison bit amplifier outputs to the front Mid-Hi housed in the car door and to the underseat sub, without the need to cut the OEM cables.

The **APBMW BIAMP 2** is compatible only with BMW and MINI vehicles that are not provided with an OEM amplifier. The package contains a pair of cables, for left and right channels. The cables are 450 cm long to reach the vehicle boot, where the Audison bit amplifier is installed.

FEATURES

Made for BMW and Mini

Retrieve the OEM source front stereo audio signal.

Sold in pairs

The package contains a pair of cables, one for the front left channel and one for the front right channel.

Plug & Play

This Plug & Play harness provides the ability to bi-amplify the front speakers of BMW and MINI vehicles that are not provided with an OEM amplifier.

T connection

The "T" connection type allows the user to separately route the signal to the front Mid-Hi housed in the car door and to the underseat sub, without the need to cut the OEM cables.

450 cm long

The cable is 450 cm long to reach the vehicle boot, where the Audison bit amplifier is installed.
